

About AccelerateMT Programs:

Accelerate Montana offers a broad range of programs to benefit businesses and individuals alike - regardless of where you live or work in Montana. In order to meet our mission of accelerating economic potential, we have assembled teams who can support, guide, and consult with you on your business or help guide you in your career.

Through the broad range of our programs, we strive to help build business capacity and support Montana's economic development. Members of our team are expert at guiding entrepreneurs through the start-up of a business: from launch phase to its early stages as a young company. And, our network of peers allows us to help regardless of where those entrepreneurs live in our state.

We have a range of programs designed to support Montana's small businesses in addition to programs that can enable businesses small or large to access new markets overseas or ensure that their company is considered for state or federal contracting. And we have team members that can connect businesses to the basic advice, tools and skills that every business needs to function.

Finally, the courses offered through our Rapid Training Program are designed to help individuals get the skills they need to build jobs or careers in Montana's fastest-growing and largest industry sectors of construction, manufacturing, technology, healthcare, film and media. These courses are designed to help build the skills that industries most say they need. Courses are offered across the state through our partners and are designed to be fast, flexible, affordable and precisely what workers and companies need.

Statement For Operation Next Press Release.:

Accelerate Montana is thrilled to be supporting programs like Operation NEXT. Partnering with agencies such as LIFT, NFAMI, and Highlands College is a key component of Accelerate Montana's Rapid Training program and is essential in attaining our goal of delivering quality training programs in high demand careers. Operation NEXT is a great resource to help our service members and their families work towards a rewarding career in advanced manufacturing and generate economic prosperity for their families and communities.
